The Aeronautical Journal of the Royal Aeronautical Society

INCORPORATING THE INSTITUTION OF AERONAUTICAL ENGINEERS, THE HELICOPTER ASSOCIATION OF GREAT BRITAIN AND THE SOCIETY OF LICENSED AIRCRAFT ENGINEERS AND TECHNOLOGISTS

VOLUME XCVI

JANUARY-DECEMBER 1992

SUBJECT INDEX

AERODYNAMICS

A boundary element method for the potential, compressible aerodynamics of bodies in arbitrary motion, M. Gennaretti, and L. Morino, pp 15-19 (Jan.).

A Low-speed aerodynamic model for harmonically oscillating aircraft configurations, N. Singh, and S. Bhattacharya, pp 280-285 (Aug./Sept.)

End plate interference effects on the aerodynamics of a circular cylinder in uniform flow, T. A. Fox, pp 10-14 (Jan.).

Flow past two tandem circular cylinders of unequal diameter, S. C. Luo, and T. L. Gan, pp 105-114 (Mar.).

The prediction of riblet behaviour with a low Reynolds number k-ε model, B.E. Launder, and S-P. Li, pp 351-355 (Nov.).

Wing pressure loads on canard configurations: a comparison between numerical results and experimental data, G. Buresti, G. Lombardi and P. Petagna, pp 271-279 (Aug./Sept.)

Technical note — High Mach number dynamic stability of blunt slender cones at angles of attack, M. Khalid, pp 356-359 (Nov.).

AEROFOILS

Incompressible flow past a flat plate aerofoil with leading edge separation bubble, B. G. Newman, and M-C. Tse, pp 57-65 (Feb.).

Numerical prediction of transonic viscous flows around aerofoils through an Euler/boundary layer interaction method, D. P. Coiro, M. Amato and P. de Matteis, pp 157-165 (April).

The use of variable camber to reduce drag, weight and costs of transport aircraft, J. J. Spillman, pp 1-9 (Jan.).

Unsteady effects of camber on the aerodynamic characteristics of a thin aerofoil near the ground, M.F. Zedan, and A.O. Nuhait, pp 343-350 (Nov.).

AEROSPACEPLANES

Experiments on Space Shuttle orbiter models in a free piston shock tunnel, R.M. Krek, and R.J. Stalker, pp 249-259 (Aug./Sept.)

Technology developments within the pre-design phase of the Hermes spaceplane programme, U. L. Berkes, pp 380-386 (Dec.).

BLADE VORTEX INTERACTION

An examination of the vortex convection effects during blade vortex interaction, M. B. Horner, E. Saliveros and R. A. McD. Galbraith, pp 374-380 (Dec).

An experimental investigation of the oblique blade-vortex interaction, M. B. Horner, E. Saliveros and R. A. McD. Galbraith, pp 185-191 (May).

BOOK REVIEW — AUTHORS

Aliabadi, M. H. and Rooke, D. P., Numerical Fracture Mechanics, p 243 (June/July).

Angelino, G. *et al* (Eds), Modern Research Topics in Aerospace Propulsion: in Honor of Corrado Casci, p 115 (Mar.).

Argyris J. and Mlejnek, H.-P., Dynamics of Structures, p 65 (Feb.).

Bakker, P. G., Bifurcations in Flow Patterns: Some Applications of the Theory of Differential Equations in Fluid Dynamics, p 244 (June/July).

Bhattacharyya, A. K. and Sengupta, D. L., Radar Cross Section Analysis and Control, p 65 (Feb.).

Brewer, G. D., Hydrogen Aircraft Technology, p 326 (Oct.).

Bushnell, D. M. and Hefner, J. N. (Eds), Viscous Drag Reduction in Boundary Layers, p 65 (Mar.).

Datoo, M. H., Mechanics of Fibrous Composites, p 243 (June/July).

Evans, B. G., Satellite Communications Systems — Second edition, p 204 (May).

Fortescue, P. and Stark, J. (Eds), Spacecraft Systems Engineering, p 115 (Mar.).

John, V. Introduction to Engineering Materials — Third Edition, p 326 (Oct.).

Katz, J. and Plotkin, A. Low-Speed Aerodynamics: from Wing Theory to Panel Methods, p 204 (May).

Lay, L. A., Corrosion Resistance of Technical Ceramics — Second edition, p 166 (Apr.).

Lesieur, M., Turbulence in Fluids: Stochastic and Numerical Modelling — Second revised edition, p 29 (Jan.).

Levine, S. R. (Ed), Ceramics and Ceramic-Matrix Composites. Flight Vehicle Materials, Structures and Dynamics: Assessment and Future Directions series vol 3, p 397 (Dec.).

Lothes, R. N. *et al*, Radar Vulnerability to Jamming, p 29 (Jan.).

Shahrokhi, F. *et al* (Eds), Space Commercialization: Launch Vehicles and Programs, p 65 (Feb.).

Mair, W. A. and Birdsall, D. L., Aircraft Performance, p 286 (Aug./Sept.)

Morchin, W. C., Airborne Early Warning Radar, p 204 (May).

O'Conner, P. D. T., Practical Reliability Engineering — Third Edition, p 326 (Oct.).

Pai, S.-I. and Luo, S., Theoretical and Computational Dynamics of a Compressible Flow, p 364 (Nov.).

Rom, J. High Angle of Attack Aerodynamics: Subsonic, Transonic and Supersonic Flows, p 286 (Aug./Sept.).

Schwarzenbach, J. and Gill, K. F., System Modelling and Control — Third edition, p 363 (Nov.).

Shaw, C. T., Using Computational Fluid Dynamics, p 286 (Aug./Sept.)

Stevens, B. L. and Lewis, F. L., Aircraft Control and Simulation, p 397 (Dec.).

Sutton, G. P., Rocket Propulsion Elements: an Introduction to the Engineering of Rockets — Sixth edition, p 397 (Dec.).

Wegimer, P. P., What Makes Airplanes Fly: History, Science and Applications of Aerodynamics, p 363 (Nov.).

Wertz, J. R. and Larson W. J. (Eds), Space Mission Analysis and Design, p 166 (Apr.).

BOOK REVIEWS — TITLES

Airborne Early Warning Radar, W. C. Morchin, p 204 (May).

Aircraft Performance, W. A. Mair,and D. L.Birdsall, p 286 (Aug./Sept.)

Bifurcations in Flow Patterns: Some Applications of the Theory of Ceramics and Ceramic-Matrix Composites. Flight Vehicle Materials, Structures and Dynamics: Assessment and Future Directions series vol 3, S. R. Levine (Ed), p 397 (Dec.).

Corrosion Resistance of Technical Ceramics — Second edition, L. A. Lay, p 166 (Apr.).

Differential Equations in Fluid Dynamics, P. G. Bakker, p 244 (June/July).

Dynamics of Structures, J. Argyris and H.-P. Mlejnek, p 65 (Feb.).

High Angle of Attack Aerodynamics: Subsonic, Transonic and Supersonic Flows, J. Rom, p 286 (Aug./Sept.).

Hydrogen Aircraft Technology, G. D. Brewer, p 326 (Oct.).
Introduction to Engineering Materials — Third Edition, V. John, p 326 (Oct.).
Low-Speed Aerodynamics: from Wing Theory to Panel Methods, J. Katz, and A. Plotkin, p 204 (May).
Mechanics of Fibrous Composites, M. H. Datoo, p 243 (June/July).
Mission Analysis and Design, J. R. Wertz, and W. J. Larson (Eds), p 166 (Apr.).
Modern Research Topics in Aerospace Propulsion: in Honor of Corrado Casci, G. Angelino, *et al* (Eds), p 115 (Mar.).
Numerical Fracture Mechanics, M. H. Aliabadi, and D. P. Rooke, p 243 (June/July).
Practical Reliability Engineering — Third Edition, P. D. T. O'Conner, p 326 (Oct.).
Radar Cross Section Analysis and Control, A. K. Bhattacharyya and D. L. Sengupta, p 65 (Feb.).
Radar Vulnerability to Jamming, R. N. Lothes, *et al*, p 29 (Jan.).
Satellite Communications Systems — Second edition, B. G. Evans, p 204 (May).
Rocket Propulsion Elements: an Introduction to the Engineering of Rockets — Sixth edition, G. P.Sutton, p 397 (Dec.).
Space Commercialization: Launch Vehicles and Programs, F. Shahrokhi, *et al* (Eds), p 65 (Feb.).
Spacecraft Systems Engineering, P. Fortescue, and J. Stark (Eds), p 115 (Mar.).
System Modelling and Control — Third edition, J. Schwarzenbach, and K. F. Gill, p 363 (Nov.).
Theoretical and Computational Dynamics of a Compressible Flow, S.-I. Pai, and S. Luo, p 364 (Nov.).
Turbulence in Fluids: Stochastic and Numerical Modelling — Second revised edition, M. Lesieur, p 29 (Jan.).
Using Computational Fluid Dynamics, C. T. Shaw, p 286 (Aug./Sept.)
Aircraft Control and Simulation, B. L. Stevens and F. L. Lewis, p 397 (Dec.).
Viscous Drag Reduction in Boundary Layers, D. M. Bushnell, and J. N. Hefner (Eds), p 65 (Mar.).
What Makes Airplanes Fly: History, Science and Applications of Aerodynamics, P. P. Wegimer, p 363 (Nov.).

BOUNDARY LAYER
Incompressible flow past a flat plate aerofoil with leading edge separation bubble, B. G. Newman, and M-C. Tse, pp 57-65 (Feb.).
Numerical prediction of transonic viscous flows around aerofoils through an Euler/boundary layer interaction method, D. P. Coiro, M. Amato and P. de Matteis, pp 157-165 (April).
Numerical studies of supersonic flow over a compression corner, S. C. Holmes, and L. C. Squire, pp 87-95 (Mar.).

BUCKLING AND INSTABILITY OF STRUCTURES
Buckling of laminated composite plates and shell panels with some free edges under compression and shear, M. K. Prabhakara, pp 20-26 (Jan.).
Generic buckling of thick orthotropic cylindrical shells, I. H. Yang and W. S. Kuo, pp 313-318 (Oct.).

CANARDS
Wing pressure loads on canard configurations: a comparison between numerical results and experimental data, G. Buresti, G. Lombardi and P. Petagna, pp 271-279 (Aug./Sept.)

COMPOSITE MATERIALS
Buckling of laminated composite plates and shell panels with some free edges under compression and shear, M. K. Prabhakara, pp 20-26 (Jan.).
The first fifty years of composite materials in aircraft construction, D. H. Middleton, pp 96-104 (Mar.).

COMPUTATIONAL FLUID DYNAMICS
The numerical simulation of flow about installed aero-engine nacelles using a finite element Euler solver on unstructured meshes, J. Peiró, J. Peraire, K. Morgan, O. Hassan, and N. Birch, pp 224-232 (June/July).

CONES
Technical note — High Mach number dynamic stability of blunt slender cones at angles of attack, M. Khalid, pp 356-359 (Nov.).

CONTROL SYSTEMS
Short Note - Helicopter rotor simulation: a teaching aid, M. M. Zdravkovich, and D. Bretnall, p 203 (May).

DESIGN AND DEVELOPMENT
Design of an advanced nacelle for a very high bypass ratio engine, J.-L. Lecordix, J.-M. Gippet and J.-L. Duparcq, pp 388-396 (Dec.).
Lighter-than-air developments in the United Kingdom, A. W. L. Nayler, pp 192-199 (May).
Technology developments within the pre-design phase of the Hermes spaceplane programme, U. L. Berkes, pp 381-387 (Dec.).
The 36th Roy Chadwick Lecture - Manufacturing Breakout 1941-1991. Development in aerospace manufacturing techniques, P. H. Summerfield, pp 35-46 (Feb.).
The 37th Chadwick Lecture. The user friendly airliner, A. C. D. Cumming, pp 331-342 (Nov.).

DRAG
The use of variable camber to reduce drag, weight and costs of transport aircraft, J. J. Spillman, pp 1-9 (Jan.).

FLIGHT OPERATIONS
Breaking through the 10^6 barrier, R. Howard, pp 260-270 (Aug./Sept.)
The 1991 Cierva Lecture. Aberdeen and its influence on the evolution of the commercial IFR twin engined helicopter, A. C. Gordon, pp 169-184 (May).

FLUID DYNAMICS: FLOW
A boundary element method for the potential, compressible aerodynamics of bodies in arbitrary motion, M. Gennaretti, and L. Morino, pp 15-19 (Jan.).
End plate interference effects on the aerodynamics of a circular cylinder in uniform flow, T. A. Fox, pp 10-14 (Jan.).
Flow past two tandem circular cylinders of unequal diameter, S. C. Luo, and T. L. Gan, pp 105-114 (Mar.).
Incompressible flow past a flat plate aerofoil with leading edge separation bubble, B. G. Newman, and M-C. Tse, pp 57-65 (Feb.).
Impinging jets in cross flow, K. Knowles, D. Bray, P. J. Bailey, and P. Curtis, pp 47-56 (Feb.).
The Second Goldstein Lecture. Modern developments in fluid dynamics — an addendum, J. E. Green, pp 69-86 (Mar.).

FLUTTER
A Low-speed aerodynamic model for harmonically oscillating aircraft configurations, N. Singh, and S. Bhattacharya, pp 280-285 (Aug./Sept.)

GROUND EFFECT
Unsteady effects of camber on the aerodynamic characteristics of a thin aerofoil near the ground, M.F. Zedan, and A.O. Nuhait, pp 343-350 (Nov.).

HEAT TRANSFER
Experiments on Space Shuttle orbiter models in a free piston shock tunnel, R.M. Krek, and R.J. Stalker, pp 249-259 (Aug./Sept.)

HISTORICAL
The 31st Lanchester Lecture. Lanchester - the Man, J. A. D. Ackroyd, pp 119-140 (April).
The first fifty years of composite materials in aircraft construction, D. H. Middleton, pp 96-104 (Mar.).
The inaugural Willy Messerchmitt Lecture, G. Madelung, pp 366-373 (Dec.).

HYPERSONICS
Technical Note — Hydrogen combustion in a hypersonic airstream, R. T. Casey, R. J. Stalker and C. Brescianini, pp 200-202 (May).
In-flight evaluation of Mach number at hypersonic speeds, E. N. Brailsford, pp 152-156 (April).

LIGHTER THAN AIR
Lighter-than-air developments in the United Kingdom, A. W. L. Nayler, pp 192-199 (May).

JETS
Impinging jets in cross flow, K. Knowles, D. Bray, P. J. Bailey, and

P. Curtis, pp 47-56 (Feb.).
Technical Note - The impingement of underexpanded, axisymmetric rocket motor exhausts and cold jets on flat plates, T. J. Cobbald, pp 27-28 (Jan.).

MANUFACTURING
The 36th Roy Chadwick Lecture — Manufacturing Breakout 1941-1991. Development in aerospace manufacturing techniques, P. H. Summerfield, pp 35-46 (Feb.).

NACELLES
Design of an advanced nacelle for a very high bypass ratio engine, J.-L. Lecordix, J.-M. Gippet and J.-L. Duparcq, pp 388-396 (Dec.).
The numerical simulation of flow about installed aero-engine nacelles using a finite element Euler solver on unstructured meshes, J. Peiró, J. Peraire, K. Morgan, O. Hassan, and N. Birch, pp 224-232 (June/July).

NOISE
Progress towards quieter civil helicopters, M. V. Lowson, pp 209-223 (June/July).

PHOTOGRAPHS
Aircraft
British Aerospace stealth concept aircraft (artist's impression), p 45 (Feb.).
The Airbus A340 long range transport aircraft, p 71 (Mar.).
Artist's impression of the next generation of large transport aircraft, p 77 (Mar.).
The first all composite aircraft the Learfan, p 100 (Mar.).
Chichester-Miles Leopard prototype, p 101 (Mar.).
The elegance and high finish achieved in the Beech Starship is apparent in this photograph of the second production aircraft, p 101 (Mar.).
Grumman X-29 technology demonstrator, p 102 (Mar.).
Westland/Agusta EH101 three engine helicopter. The whole of the cockpit assembly, the cargo doors and the undercarriage sponsons with, of course, main and tail rotor blades are of composite construction, p 103 (Mar.).
'Bristow Tiger' (Aerospatiale Super Puma) in its North Sea habitat, p 182 (May).
Shamu the Whale. UK designed and built Skyship SK500L above Sea World Florida, p 193 (May).
Cameron DG-14 one man helium non-rigid airship, p 195 (May).
The Sentinel 1000 undergoing flight trials at Weekesville, North Carolina in December 1991.
Bell-Boeing V-22 Osprey, tiltrotor aircraft, p 221 (June/July).
Leichtflugzeug M17 with its designer, p 367 (Dec.).
Regional airliner M18 of 1926, p 367 (Dec.).
Longrange bomber prototype Me 264, p 368 (Dec.).
M29 demonstrator aircraft of 1932 with slotted flap and cantilevered main landing gear, p 369 (Dec.).
The consolidated Hermes baseline configuration 8R1-3, p 382 (Dec.).

Aircraft interiors
Reduction in the number of lights, gauges and switches in the Boeing 747 cockpit, p 334 (Nov.).

Automobiles
The Gold Medal Phaeton, 1898, Lanchester driving, his brother, George, nearest the camera, p 120 (April).

Educational facilities
A Rover Room, p 40 (Feb.).

Historical
Diagrams illustrating fixed wing flight (Sir George Cayley, 1809), p 70 (Mar.).

Large components
The Spitfire fuselage designed and built by Aero Research Ltd in 1940. p 96 (Mar.).
The first major composite component committed to airline service is the Airbus A310-300 fin torsion box; manufactured by Messerschmitt-Bolkow-Blohm at their Stade plant, it is seen being assembled at Toulouse, p 101 (Mar.).
Bell-Boeing V-22 Osprey tail section, p 103 (Mar.).
X-29 wing sub-structure, p 102 (Mar.).
The bearingless main rotor of the MBB BO108 helicopter is the most advanced of many composite applications in this aircraft, p 103 (Mar.).
Tornado radome on male master, after moulding, p 99 (Mar.).

Manufacturing processes
Polymer composite automated tape lay-up machine, p 42 (Feb.).
Robotic profiling of composite parts, p 42 (Feb.).

People
Lanchester, circa 1910, slide-rule in hand, p 120 (April).
Lanchester, 1933, p 121 (April).
Lanchester, circa 1936, p 121 (April).
Lanchester with rubber-powered model (1894), p 128 (April).
Willy Messerschmitt in 1935, p 366 (Dec.).
Meeting at the drawing board with Dipl Ing W. Degel, p 373 (Dec.).

Rotor simulator
The helicopter rotor simulator, p 203 (May).

Small components
Stereolithography model of valve block, p 43 (Feb.).
'Negative' model of same component, i.e. with holes as solid, p 43 (Feb.).

Test facilities
Boeing 747-400 integrated test facility, p 43 (Feb.).
Experiments using colour bands in glass tubes (Osborne Reynolds, 1883), p 70 (Mar.).
The RAE 5 metre pressurised low speed wind tunnel, p 72 (Mar.).
Whirling arm for testing aerofoils (Sir George Cayley, 1804), p 72 (Mar.).
Wright Brothers wind tunnel, p 72 (Mar.).
The Aircraft Research Association (ARA) transonic wind tunnel, p 73 (Mar.).
The European Transonic Wind Tunnel (ETW), p 73 (Mar.).
Grumman X-29 airframe undergoing ground resonance tests, p 103 (Mar.).

Test results
Separation line on the surface of the flow visualisation model, p 12 (Jan.).
Aft transition fixing confirmed by acenaphthene sublimation, p 76 (Mar.).
Photograph of flow about a circular cylinder, p 126 (April).
Visualisation of the shed vortex system on a Sea King helicopter, p 213 (June/July).
Schlieren picture of the Ariane 5/Hermes composite, p 383 (Dec.).

Wind tunnel equipment
Pressure scanning switches in wind tunnel model, p 74 (Mar.).
Six component strain gauge balance, p 74 (Mar.).

Wind tunnel models
Model of the EAP in the ARA transonic wind tunnel, p 74 (Mar.).
Sting mounted model of transonic aircraft in the ARA transonic tunnel, p 74 (Mar.).
Half model in ARA transonic tunnel, p 83 (Mar.).

RIBLETS
The prediction of riblet behaviour with a low Reynolds number k-ε model, B.E. Launder, and S-P. Li, pp 351-355 (Nov.).

ROTORCRAFT
An examination of the vortex convection effects during blade vortex interaction, M. B. Horner, E. Saliveros and R. A. McD. Galbraith, pp 374-381 (Dec).
An experimental investigation of the oblique blade-vortex interaction, M. B. Horner, E. Saliveros and R. A. McD. Galbraith, pp 185-191 (May).
Measurements of the dynamic stall vortex convection speed, R. B. Green, R. A. McD. Galbraith and A. J. Niven, pp 319-325 (Oct.).
Progress towards quieter civil helicopters, M. V. Lowson, pp 209-223 (June/July).

Short Note — Helicopter rotor simulation: a teaching aid, M. M. Zdravkovich, and D. Bretnall, p 203 (May).
The 1991 Cierva Lecture. Aberdeen and its influence on the evolution of the commercial IFR twin engined helicopter, A. C. Gordon, pp 169-184 (May).
The application of a theoretical blade sailing model to predict the behaviour of articulated rotors, S. J. Newman, pp 233-239 (June/July).

ROYAL AERONAUTICAL SOCIETY: LECTURES
The 31st Lanchester Lecture. Lanchester — the Man, J. A. D. Ackroyd, pp 119-140 (April).
The 32nd Lanchester Lecture. Longitudinal vortex control — techniques and applications, D. M. Bushnell, pp 293-312 (Oct.).
The 36th Roy Chadwick Lecture — Manufacturing Breakout 1941-1991. Development in aerospace manufacturing techniques, P. H. Summerfield, pp 35-46 (Feb.).
The 37th Chadwick Lecture — The user friendly airliner, A. C. D. Cumming, pp 331-342 (Nov.).
The 1991 Cierva Lecture. Aberdeen and its influence on the evolution of the commercial IFR twin engined helicopter, A. C. Gordon, pp 169-184 (May).
The inaugural Willy Messerchmitt Lecture, G. Madelung, pp 366-373 (Dec.).
The Second Goldstein Lecture. Modern developments in fluid dynamics — an addendum, J. E. Green, pp 69-86 (Mar.).
The use of variable camber to reduce drag, weight and costs of transport aircraft, J. J. Spillman, pp 1-9 (Jan.).

ROYAL AERONAUTICAL SOCIETY: SYMPOSIA
INTERNATIONAL TECHNICAL SPECIALISTS MEETING ON ROTORCRAFT ACOUSTICS AND ROTOR FLUID DYNAMICS Philadelphia, 15-17 October 1991.
An examination of the vortex convection effects during blade vortex interaction, M. B. Horner, E. Saliveros and R. A. McD. Galbraith, pp 374-380 (Dec).

SAFETY
Breaking through the 10^6 barrier, R. Howard, pp 260-270 (Aug./Sept.)

SUPERSONIC FLOW
Numerical studies of supersonic flow over a compression corner, S. C.Holmes, and L. C. Squire, pp 87-95 (Mar.).

STRUCTURES AND STRUCTURAL DESIGN
Generic buckling of thick orthotropic cylindrical shells, I. H. Yang and W. S. Kuo, pp 313-318 (Oct.).

TESTING
Some experimental aspects of the flow induced vibration of a cantilever mounted across two streams of air at right angles, B. A. Jubran, pp 240-242 (June/July).
Technical Note — The impingement of underexpanded, axisymmetric rocket motor exhausts and cold jets on flat plates, T. J. Cobbald, pp 27-28 (Jan.).

TRANSONIC FLOW
Numerical prediction of transonic viscous flows around aerofoils through an Euler/boundary layer interaction method, D. P. Coiro, M. Amato and P. de Matteis, pp 157-165 (April).

TURBULENCE
The low-turbulence wind tunnel at Tohoku University, H. Ito, R. Kobayashi, and Y. Kohama, pp 141-151 (April).

VIBRATION
Some experimental aspects of the flow induced vibration of a cantilever mounted across two streams of air at right angles, B. A. Jubran, pp 240-242 (June/July).

VORTICES
An examination of the vortex convection effects during blade vortex interaction, M. B. Horner, E. Saliveros and R. A. McD. Galbraith, pp 374-380 (Dec).
An experimental investigation of the oblique blade-vortex interaction, M. B. Horner, E. Saliveros and R. A. McD. Galbraith, pp 185-191 (May).
Measurements of the dynamic stall vortex convection speed, R. B. Green, R. A. McD. Galbraith and A. J. Niven, pp 319-325 (Oct.).
The 32nd Lanchester Lecture. Longitudinal vortex control — techniques and applications, D. M. Bushnell, pp 293-312 (Oct.).

WIND TUNNELS
The low-turbulence wind tunnel at Tohoku University, H. Ito, R. Kobayashi, and Y. Kohama, pp 141-151 (April).
The Second Goldstein Lecture. Modern developments in fluid dynamics — an addendum, J. E. Green, pp 69-86 (Mar.).

WINGS
The use of variable camber to reduce drag, weight and costs of transport aircraft, J. J. Spillman, pp 1-9 (Jan.).

AUTHOR INDEX

ACKROYD, J. A. D.
The 31st Lanchester Lecture. Lanchester — the Man, pp 119-140 (April).

AMATO, M., COIRO, D. AND de MATTEIS, P.
Numerical prediction of transonic viscous flows around aerofoils through an Euler/boundary layer interaction method, pp 157-165 (April).

BAILEY, P. J., CURTIS, P., KNOWLES, K. AND BRAY, D.
Impinging jets in cross flow, pp 47-56 (Feb.).

BERKES, U.L.
Technology developments within the pre-design phase of the Hermes spaceplane programme, pp 380-386 (Dec.).

BHATTACHARYA, S. AND SINGH, N.
Low-speed aerodynamic model for harmonically oscillating aircraft configurations, pp 280-285 (Aug./Sept.)

BIRCH, N., PEIRO, J., PERAIRE, J., MORGAN, K. AND HASSAN, O.
The numerical simulation of flow about installed aero-engine nacelles using a finite element Euler solver on unstructured meshes, pp 224-232 (June/July).

BRAY, D., BAILEY, P. J., CURTIS, P. AND KNOWLES, K.
Impinging jets in cross flow, pp 47-56 (Feb.).

BRAILSFORD, E. N.
In-flight evaluation of Mach number at hypersonic speeds, pp 152-156 (April).

BRESCIANINI, C., CASEY, R. T. AND STALKER, R. J.
Technical Note — Hydrogen combustion in a hypersonic airstream, pp 200-202 (May).

BRETNALL, D. AND ZDRAVKOVICH, M. M.
Short Note — Helicopter rotor simulation: a teaching aid, p 203 (May).

BURESTI, G., LOMBARDI, G. AND PETAGNA P.
Wing pressure loads on canard configurations: a comparison between numerical results and experimental data. pp 271-279 (Aug./Sept.)

BUSHNELL, D. M.
The 32nd Lanchester Lecture. Longitudinal vortex control — techniques and applications, pp 293-312 (Oct.).

CASEY, R. T., STALKER, R. J. AND BRESCIANINI, C.
Technical Note — Hydrogen combustion in a hypersonic airstream, pp 200-202 (May).

COBBALD, T. J.
Technical Note — The impingement of underexpanded, axisymmetric rocket motor exhausts and cold jets on flat plates, pp 27-28 (Jan.).

COIRO, D. P., AMATO, M. AND de MATTEIS, P.
Numerical prediction of transonic viscous flows around aerofoils through an Euler/boundary layer interaction method, pp 157-165 (April).

CUMMING A. C. D.
The 36th Chadwick Lecture. The user friendly airliner, pp 331-342 (Nov.).

CURTIS, P., KNOWLES, K., BRAY, D. AND BAILEY, P. J.
Impinging jets in cross flow, pp 47-56 (Feb.).

de MATTEIS, P., COIRO, D. P. AND AMATO, M.
Numerical prediction of transonic viscous flows around aerofoils through an Euler/boundary layer interaction method, pp 157-165 (April).

DUPARCQ, J.-L., GIPPET, J.-M. AND LECORDIX, J.-L.
Design of an advanced nacelle for a very high bypass ratio engine, pp 388-396 (Dec.).

FOX, T. A.
End plate interference effects on the aerodynamics of a circular cylinder in uniform flow, pp 10-14 (Jan.).

GALBRAITH, R. A. MCD., HORNER, M. B. AND SALIVEROS, E.
An experimental investigation of the oblique blade-vortex interaction, pp 185-191 (May).

GALBRAITH, R. A. MCD., HORNER, M. B. AND SALIVEROS, E.
An examination of the vortex convection effects during blade vortex interaction, pp 374-380 (Dec).

GALBRAITH, R. A. MCD., GREEN, R. B. AND NIVEN A. J.
Measurements of the dynamic stall convection speed, pp 319-325 (Oct.).

GAN, T. L. AND LUO, S. C.
Flow past two tandem circular cylinders of unequal diameter, pp 105-114 (Mar.).

GENNARETTI, M. AND MORINO, L.
A boundary element method for the potential, compressible aerodynamics of bodies in arbitrary motion, pp 15-19 (Jan.).

GIPPET, J.-M., DUPARCQ, J.-L. AND LECORDIX, J.-L.
Design of an advanced nacelle for a very high bypass ratio engine, pp 388-396 (Dec.).

GORDON, A. C.
The 1991 Cierva Lecture. Aberdeen and its influence on the evolution of the commercial IFR twin engined helicopter, pp 169-184 (May).

GREEN, J. E.
The Second Goldstein Lecture. Modern developments in fluid dynamics — an addendum, pp 69-86 (Mar.).

GREEN, R. B., GALBRAITH, R. A. MCD. AND NIVEN A. J.
Measurements of the dynamic stall convection speed, pp 319-325 (Oct.).

HASSAN, O., PEIRO, J., PERAIRE, J., MORGAN, K. AND BIRCH, N.
The numerical simulation of flow about installed aero-engine nacelles using a finite element Euler solver on unstructured meshes, pp 224-232 (June/July).

HOLMES, S. C. AND SQUIRE, L. C.
Numerical studies of supersonic flow over a compression corner, pp 87-95 (Mar.).

HORNER, M. B., SALIVEROS, E. AND GALBRAITH, R. A. MCD.
An experimental investigation of the oblique blade-vortex interaction, pp 185-191 (May).

HORNER, M.B., SALIVEROS, E. AND GALBRAITH, R.A.MCD.
An examination of the vortex convection effects during blade vortex interaction, pp 374-380 (Dec).

HOWARD, R.
Breaking through the 106 barrier, pp 260-270 (Aug./Sept.)

ITO, H., KOBAYASHI, R. AND KOHAMA, Y.
The low-turbulence wind tunnel at Tohoku University, pp 141-151 (April).

JUBRAN, B. A.
Some experimental aspects of the flow induced vibration of a cantilever mounted across two streams of air at right angles, pp 240-242 (June/July).

KHALID, M.
Technical note — High Mach number dynamic stability of blunt slender cones at angles of attack, pp 356-359 (Nov.).

KOBAYASHI, R., ITO, H. AND KOHAMA, Y.
The low-turbulence wind tunnel at Tohoku University, pp 141-151 (April).

KOHAMA, Y., ITO, H. AND KOBAYASHI, R.
The low-turbulence wind tunnel at Tohoku University, pp 141-151 (April).

KNOWLES, K., BRAY, D., BAILEY, P. J. AND CURTIS, P.
Impinging jets in cross flow, pp 47-56 (Feb.).

KREK, R. M. AND STALKER, R. J.
Experiments on Space Shuttle orbiter models in a free piston shock tunnel, pp 249-259 (Aug./Sept.)

KUO, W. S. AND YANG, I. H.
Generic buckling of thick orthotropic cylindrical shells, pp 313-318 (Oct.).

LAUNDER, B. E. AND LI, S-P.
The prediction of riblet behaviour with a low Reynolds number k-ε model, pp 351-355 (Nov.).

LECORDIX, J.-L., DUPARCQ, J.-L. AND GIPPET, J.-M.
Design of an advanced nacelle for a very high bypass ratio engine, pp 381-396 (Dec.).

LI, S-P. AND LAUNDER, B. E.
The prediction of riblet behaviour with a low Reynolds number k-ε model, pp 351-355 (Nov.).

LOMBARDI, G., BURESTI, G. AND PETAGNA P.
Wing pressure loads on canard configurations: a comparison between numerical results and experimental data. pp 271-279 (Aug./Sept.)

LOWSON, M. V.
Progress towards quieter civil helicopters, pp 209-223 (June/July).

LUO, S. C. AND GAN, T. L.
Flow past two tandem circular cylinders of unequal diameter, pp 105-114 (Mar.).

MADELUNG, G.
The inaugural Willy Messerchmitt Lecture, pp 366-373 (Dec.).

MIDDLETON, D. H.
The first fifty years of composite materials in aircraft construction, pp 96-104 (Mar.).

MORINO, L. AND GENNARETTI, M.
A boundary element method for the potential, compressible aerodynamics of bodies in arbitrary motion, pp 15-19 (Jan.).

MORGAN, K., HASSAN, O., PEIRO, J., PERAIRE, J., AND BIRCH, N.
The numerical simulation of flow about installed aero-engine nacelles using a finite element Euler solver on unstructured meshes, pp 224-232 (June/July).

NAYLER, A. W. L.
Lighter-than-air developments in the United Kingdom, pp 192-199 (May).

NEWMAN, B. G. AND TSE, M-C.
Incompressible flow past a flat plate aerofoil with leading edge separation bubble, pp 57-65 (Feb.).

NEWMAN, S. J.
The application of a theoretical blade sailing model to predict the behaviour of articulated rotors, pp 233-239 (June/July).

NIVEN A. J., GALBRAITH, R. A. MCD. AND GREEN, R. B.
Measurements of the dynamic stall convection speed, pp 319-325 (Oct.).

NUHAIT, A. O. AND ZEDAN, M. F.
Unsteady effects of camber on the aerodynamic chararcteristics of a thin aerofoil near the ground, pp 343-350 (Nov.).

PEIRO, J., PERAIRE, J., MORGAN, K., HASSAN, O. AND BIRCH, N.
The numerical simulation of flow about installed aero-engine nacelles using a finite element Euler solver on unstructured meshes, pp 224-232 (June/July).

PERAIRE, J., MORGAN, K., HASSAN, O., PEIRO, J. AND BIRCH, N.
The numerical simulation of flow about installed aero-engine nacelles using a finite element Euler solver on unstructured meshes, pp 224-232 (June/July).

PETAGNA P., BURESTI, G. AND LOMBARDI, G.
Wing pressure loads on canard configurations: a comparison between numerical results and experimental data. pp 271-279 (Aug./Sept.)

PRABHAKARA, M. K.
Buckling of laminated composite plates and shell panels with some free edges under compression and shear, pp 20-26 (Jan.).

SINGH, N. AND BHATTACHARYA, S.
Low-speed aerodynamic model for harmonically oscillating aircraft configurations, pp 280-285 (Aug./Sept.)

SALIVEROS, E., HORNER, M. B. AND GALBRAITH, R. A. MCD.
An experimental investigation of the oblique blade-vortex interaction, pp 185-191 (May).

SALIVEROS, E., HORNER, M. B. AND GALBRAITH, R. A. MCD.
An examination of the vortex convection effects during blade vortex interaction, pp 374-380 (Dec).

SPILLMAN, J. J.
The use of variable camber to reduce drag, weight and costs of transport aircraft, pp 1-9 (Jan.).

SQUIRE, L. C. AND HOLMES, S. C.
Numerical studies of supersonic flow over a compression corner, pp 87-95 (Mar.).

STALKER, R. J., CASEY, R. T. AND BRESCIANINI, C.
Technical Note — Hydrogen combustion in a hypersonic airstream, pp 200-202 (May).

STALKER, R. J. AND KREK, R. M.
Experiments on Space Shuttle orbiter models in a free piston shock tunnel, pp 249-259 (Aug./Sept.)

SUMMERFIELD, P. H.
The 36th Roy Chadwick Lecture — Manufacturing Breakout 1941-1991. Development in aerospace manufacturing techniques, pp 35-46 (Feb.).

TSE, M-C. AND NEWMAN, B. G.
Incompressible flow past a flat plate aerofoil with leading edge separation bubble, pp 57-65 (Feb.).

YANG, I. H. AND KUO, W. S.
Generic buckling of thick orthotropic cylindrical shells, pp 313-318 (Oct.).

ZDRAVKOVICH, M. M. AND BRETNALL, D.
Short Note — Helicopter rotor simulation: a teaching aid, p 203 (May).

ZEDAN, M. F. AND NUHAIT, A. O.
Unsteady effects of camber on the aerodynamic chararcteristics of a thin aerofoil near the ground, pp 343-350 (Nov.).
